SPINE AND INTERVENTIONAL PAIN MANAGEMENT

PINEHURST SURGICAL

PINEHURST, NORTH CAROLINA

SPINE AND INTERVENTIONAL PAIN MANAGEMENT

PINEHURST SURGICAL

We'd like to introduce you to Spine and Interventional Pain Management of Pinehurst Surgical. Our staff is comprised of specialized, compassionate healthcare professionals who understand that no two patients are exactly alike. We know that each patient has different needs and goals.

Neck and low back pain can originate from a number of structures that make up your spine. We utilize several different modalities to diagnose the source of your pain. You can be sure that you will be listened to, and a comprehensive neuromuscular exam will be performed. Onsite imaging, electrodiagnostic testing, and interventional injections are available if necessary.

Our emphasis is on functional restoration through pain relief and physical therapy. We offer stepwise management of spine related conditions and deal with your pain or injury in the context of your lifestyle and functional abilities. It is our goal to allow you to continue to be active with minimal pain.

Come see us!
